Homework 13: Transforming Portrait Photographs

Assigned:  
Due:  
No extensions!

Summary: In this assignment, you will further explore the manipulation of existing images in the GIMP.

Purposes: To give you the opportunity to play a bit.

Expected Time: One to two hours.

Collaboration: You may work in a group of any size between one and four, inclusive. You may consult others outside your group, provided you cite those others. You need only submit one assignment per group.

Submitting: Email me your work, using a subject of CSC151 Homework 13.

Warning: So that this exercise is a learning assignment for everyone, I may spend class time publicly critiquing your work.

Background

As you may recall from class time during the lab on image manipulation, I tried (unsuccessfully) to come up with an “interesting” modification to make to our teaching assistant’s picture.

Among other things, I tried rotating colors (not very interesting), scaling colors (not very interesting), finding the browns in the image and changing them to red (the test I wrote to identify browns was wrong), and a few other things.

Assignment

Now it’s your turn. Write a procedure, transform-portrait-color, that, given the color of one pixel from a typical portrait (say, one from a StalkerNet picture), generates another. Your procedure should be such that when applied to a full portrait, it gives an “interesting” result.

Your procedure should have at least one conditional (e.g., something to represent “if the color is a shade of brown, remove the red component”).

You may find it helpful to write a procedure that, given two colors, determines how close one color is to another.
Copyright Issues

As far as I know, Grinnell College owns the copyright in your StalkerNet photos. However, I also believe that academic fair use permits you to use those photos for this purpose, provided you do not post your results to the Web or make profit from those results. If you are uncomfortable using your StalkerNet photo, you are free to pick another portrait (e.g. a portrait of a current or past president) whose copyright is such that you are comfortable using it. If you cannot find such a photo, please speak with me (or email me) at your earliest convenience.
