

## Class 35: Writing Script-Fu Procedures

**Held:** Wednesday, April 4, 2007

**Summary:** Today we consider how we might write our own drawing procedures.

### Related Pages:

- EBoard.
- Lab: Writing Script-Fu Procedures.
- Reading: Writing Script-Fu Procedures.

### Notes:

- Are there questions on the exam?
- I've had a request to turn in the exam on Tuesday morning, so I'll be rearranging next week's schedule a bit.

### Overview:

- Reflections on the first Script-Fu Lab.
- Writing procedures for Script-Fu.
- Lab.

## Reflections on the First Script-Fu Lab

- What was your favorite part of the first Script-Fu lab?
- What was your least favorite part of that lab?
- What advantages, if any, are there from being able to write Script-Fu commands for GIMP? (As compared to doing things manually?)
- What else would you like to learn about Script-Fu?
- I won't necessarily follow your guidance, but I might.
- What other commands would you like?

## Writing Script-Fu Procs

- Open DrScheme.
- Write the procedure. Don't try to run it in DrScheme.
- Save the file (perhaps to the desktop).
- Load it in the ScriptFu console.
- Run it.
- *I'll demonstrate the above.*

# Lab

- Do the lab.
