

Class 16: Boolean Values and Predicate Procedures

Held: Monday, 18 February 2008

Summary: We consider the ways in which Scheme supports yes/no questions and procedures that can be used to ask such questions.

Related Pages:

- EBoard.
- Lab: Boolean Values and Predicate Procedures.
- Reading: Boolean Values and Predicate Procedures.

Notes:

- Exam 1 and Quiz 3 returned. If you needed the “There’s more to life” option on the exam, you should try to see me some time this week. (Look at the exam answer key first.) If you failed to write “There’s more to life than CS” on the exam, I did not impose that policy. Catch me during or after class if you simply forgot.
- I’ll allow a few minutes at the beginning of class to set up partners for assignment 4.
- Reading for tomorrow: Conditionals.

Overview:

- Boolean values.
- Predicates - Procedures that return Boolean values.
- Combining booleans with `and` and `or`.
