

Class 20: Transforming Colors

Held: Monday, 25 February 2008

Summary: Today we explore common ways in which to transform colors, pixels, and images.

Related Pages:

- EBoard.
- Lab: Transforming RGB Colors.
- Reading: Transforming RGB Colors.

Notes:

- I forgot to take the quiz to my mid-faculty workshop this weekend, and hence have not had a chance to grade it.
- Does anyone who missed class on Friday need a partner for HW5?
- Are there questions on HW5?
- My laptop goes in for service today, which is likely to delay some things.
- Office hours cancelled tomorrow a.m. (meeting).

Overview:

- Computing new colors from old.
- Some basic transformations.
- Transforming pixels and images.

Key Concepts

- We can use the same operation in multiple ways
 - On colors
 - On a pixel in an image
 - On whole images (pixel by pixel)
- Control structure: *map* means “do to/with every component”
- Control structure: *compose* means “apply in order, right to left”
