Class 41: Analyzing Procedures

Held: Monday, April 19, 2010

Summary: We consider techniques for analyzing the number of calls made in evaluating procedures, particularly recursive procedures.

Related Pages:

- EBoard.
- Lab: Analyzing Procedures.
- Reading: Analyzing Procedures.

Notes:

- I’ll reserve a few minutes at the start of class to go over the latest homework assignment.
- We seem to have a number of ill students today. Please take extra precautions this week.
- We’ll also talk about the project proposals a bit today.

Overview:

- Comparing algorithms.
- Two related metrics: Time and Number of steps.
- Counting procedure calls by printing.
- Tools for analysis.

Overview

- When comparing algorithms, we often care which one is faster.
- We can analyze by hand.
- We can analyze by using a library written at Grinnell.
- We can carefully study the code and predict (covered in future CS courses)

Steps in Automating Analysis

- Replace define with define$.
- Type (analyze exp procedure)
- Alternately, type (analyze exp).
Lab

- Do the lab.
