Class 48: Insertion Sort

Held: Friday, April 30, 2010

Summary: We move from our general exploration of sorting to the implementation of a particular sorting algorithm, *insertion sort*. We also explore how the running time for that algorithm varies based on the number of values we are sorting.

- EC for Saturday’s Field Day, provided you’re not in Dag.

Overview:

- Expressing sorting algorithms in code.
- Key technique: Insertion.
- Analyzing insertion sort.

Preparation: Insertion Sort

- What is the key idea in insertion sort?
- How does insertion sort differ in lists and vectors?
- Why do we provide you with three different kinds of list-based insertion sort (and four kinds of insertion sort)?

Lab

- Do the lab on sorting.
- Be prepared to reflect.
