

## Class 12: More C Stuff, Including a Bit on Make

**Held:** Friday, February 16, 2007

**Summary:** Today we continue our exploration of C, grounding our exploration in two examples.

### Related Pages:

- EBoard.

### Due

- HW4.

### Assignments

- HW5.

### Notes:

- The readings for Monday are the same as the readings for last Monday (McCarthy's History of Lisp plus two things by Paul Graham).
- Don't forget lunch with Atul Gupta today JR25C PDR 224C.
- I'm not thrilled at the number of you who submitted HW after midnight.

### Overview:

- Quicksort, continued.
- Representing points.

## Quicksort, Continued

- We'll continue the example from yesterday.
- How did you design the comparator?
- What if we want more than one kind of quicksort in the same program?
- As we start to build more files, how do we keep track of what changes affect what executables?

## Representing Points

- We'll continue the exploration of C using the idea of points from the previous homework.
