CSC151.02 2014S, Class 14: Transforming Images

Overview

- Preliminaries.
  - Admin.
  - Upcoming work.
  - Questions on the exam.
- The big picture: Functions as values.
- Questions on today’s topics.
- Lab.

Preliminaries

Admin

- I won’t be able to hold a review session this week. I apologize.
- Don’t forget that we generally can’t see the effects of the pixel operations if the image is already visible.
- Don’t forget that we generally can’t refer to an image if you’ve closed it in Gimp.
- Both the graders and I remain a bit behind.
- Extra credit:
  - Thursday extra, Thursday @ 4:30 p.m., Sci. 3821, Red/Black trees.
  - CS Table Friday @ noon: Law, Order, and Computers
  - Royce Wolf Piano, Wednesday, Noon, Sebring-Lewis
  - Opera Iowa: The Elixir of Love, Thursday, 7:30, Roberts

Upcoming Work

- Exam 1 due tonight!
  - Bring printed copies to class tomorrow: Stapled, with your name on every page, signed and dated (if possible), etc.
- Wednesday’s reading: Homogeneous Lists
- Lab writeup: Exercises 3 and 7a
  - Subject: CSC 151.02 Writeup 10: Transforming Images (YOUR NAME)
Questions on the Exam

*Do the academic honesty statements really need to be a separate page?*

No, but it’s convenient.

*How should we cite?*

"I used this procedure which I wrote on this lab with this incredibly helpful and friendly colleague"

*Do we need to sign the electronic copy?*

No.

*Should we include the code for the drawings that we’re using?*

No, if it’s included in the exam code we distributed.

Yes, if it’s not included in the exam code.

*Does a test suite suffice as an example?*

Yes.

*Do we need to explain the values we chose to test?*

No, but a short note may not hurt.

*What happens when my military->civilian does everything but 0 and 12?*

You should note that you’ve found the problem.

You’ll get partial credit.

And if you have two procedures that each partially get it, I’ll look at both.

*Should I attach or print drawings?*

No.

The Big Picture: Functions as Values

- image-transform is magic. It applies a transformation to every pixel
- Form (image-transform image color-transformation)
- Subtle thing: Procedures are appearing in a different place
  - Traditionally (PROCEDURE INPUT)
  - Now (PROCEDURE ... ANOTHER-PROCEDURE)
Questions

Lab

Things to make our brain hurt. How do you invert redder, for the colors for which you can invert redder?

(define anti-redder (o irgb-complement irgb-redder irgb-complement))
