

Class 15: Gene Prediction (2)

Held: Thursday, 15 October 2009

Summary: We continue our exploration of gene prediction by (a) considering a relatively new technique for gene prediction and (b) beginning to write our own code for finding and filtering ORFs.

- Due: Reflection on Kellis et al. 2003.

Notes:

- No work for this class during break (other than self review).
- We'll have a review for the exam Tuesday after break.
- Have a great break!

Overview:

- Kellis et al. 2003.
- Project 6.5.

Discussion of Kellis et al. 2003

A few initial questions:

- Why is *S. cerevisiae* used as a model organism?
- What do you see as the important results of this paper?
- What pre-existing algorithms do the authors rely upon?

Project 6.5
