This exam is closed-internet, closed-other people, but open-book. You will be graded by the same criteria and level as you are on the homeworks. You may speak with Prof. Anya Vostinar about the questions, but not the mentors. If you come to me for a question, make sure you have followed the steps to solving a problem that we discussed in class. I won’t help you until you’ve demonstrated that you have worked through those steps and which step you are stuck on.

Chapter 4 problem 28 (hint, read over problem 27)

Chapter 5 problem 3

Chapter 6 problem 24 (hint, the answer won’t be in the bottom right cell of the table, you will need to scan the whole table to check for a valid answer)
