

<i>Tuesday</i>	<i>Thursday</i>
<p>January 20 Talk 0: Logistics Administrivia <i>Henry Walker</i></p>	<p>January 22 <i>No Group Meeting Today</i></p>
<p>January 27 Talk 1: Basics of Networks and the Internet Protocols Interview: Leonard Kleinrock (pp. 70-71) Sections 1.1-1.3 <i>Student A</i></p>	<p>January 29 Talk 3: Access Networks Physical Media Delay and Loss in Packet-Switched Networks Sections 1.5-1.6 <i>Student C</i></p>
<p>Talk 2: The Network Core Section 1.4 <i>Student B</i></p>	<p>Talk 4: Protocol Layers and Their Service Models Internet Backbones National Access Points (NAPs) Internet Service Providers (ISPs) A Brief History of Networking and the Internet Sections 1.7-1.10 <i>Student D</i></p>
<p>February 3 Talk 5: Application-Layer Protocols Applications Needs and Services Provided Introduction to the World Wide Web Nonpersistent and Persistent Connections Sections 2.1-2.2.2 <i>Student E</i></p>	<p>February 5 Talk 7: Electronic Mail SMTP, Comparison with HTTP Mail Message Formats, MIME, Access Protocols Continuous Media E-Mail Section 2.4 <i>Student B</i></p>
<p>Talk 6: HTTP Message Format User-Server Interaction Authentication, Cookies Conditional GET Web Caches File Transfer via FTP Sections 2.2.3-2.3 <i>Student A</i></p>	<p>Talk 8: Domain Name System (DNS) Services Mechanisms Records, Messages Socket Programming with TCP Sections 2.5-2.6 <i>Student C</i></p>

<i>Tuesday</i>	<i>Thursday</i>
<p>February 10 Talk 9: Socket Programming with UDP A Simple Web Server Functions Interview: Tim Berners-Lee (pp. 165-166) Sections 2.7-2.9 <i>Student D</i></p>	<p>February 12 Talk 11: Reliable Data Transfer Principles Protocols and Pipelined Protocols Sections 3.4.1-3.4.2 <i>Student A</i></p>
<p>Talk 10: The Transport Layer Services Principles Multiplexing and Demultiplexing Applications Connectionless Transport: UDP Sections 3.1-3.3 <i>Student E</i></p>	<p>Talk 12: More Reliable Data Transfer Go-Back-N (GBN) Selective Repeat (SR) Sections 3.4.3-3.4.4 <i>Student B</i></p>
<p>February 17 Talk 13: Connection-Oriented Transport: TCP TCP Connections, Segment Structure Sequence Numbers, Acknowledgment Numbers Telnet Sections 3.5.1-3.5.4 <i>Student C</i></p>	<p>February 19 Talk 15: Congestion Control Causes, Costs Principles Approaches Section 3.6 <i>Student E</i></p>
<p>Talk 14: More TCP Reliable Data Transfer, Flow Control Round Trip Time, Timeout, Connection Management Interview: Sally Floyd (pp. 269-270) Sections 3.5.5-3.5.8 <i>Student D</i></p>	<p>Talk 16: TCP Congestion Control Overview Static Congestion Modeling Dynamic Congestion Modeling Sections 3.7-3.8 <i>Student A</i></p>

<i>Tuesday</i>	<i>Thursday</i>
<p>February 24 Talk 17: Network Service Models Routing Datagrams, Virtual Circuit Service A Link State Routing Algorithm Sections 4.1-4.2.1 <i>Student B</i></p>	<p>February 26 Talk 19: Internet Routing IPv1 Addressing Addressing and Routing Datagrams Datagram Format Sections 4.4.1-4.4.2 <i>Student D</i></p>
<p>Talk 18: Routing Algorithms Distance Vector Routing and Other Algorithms Hierarchical Routing Interview: Jose Joaquin Garcia-Luna-Aceves (pp. 377-378) Sections 4.2.2-4.3 <i>Student C</i></p>	<p>Talk 20: More Internet Routing IP Fragmentation Internet Control Message Protocol: ICMP Routing in the Internet Sections 4.4.3-4.5 <i>Student E</i></p>
<p>March 2 Talk 21: Routers Input and Output Ports Switching and Queuing IPv6 Sections 4.6-4.7 <i>Student A</i></p>	<p>March 4 <i>No Group Meeting</i></p>
<p>Talk 22: Multicast Routing Internet Multicast Abstraction, Multicast Groups IGMP Protocol Sections 4.8-4.9 <i>Student B</i></p>	

<i>Tuesday</i>	<i>Thursday</i>
<p>March 9 Talk 23: Data Link Layer Services Error Detection and Correction Interview: Robert Metcalfe Sections 5.1-5.2 <i>Student C</i></p>	<p>March 11 Talk 25: LAN Addresses Address Resolution Protocol (ARP) Ethernet Basics Sections 5.4-5.5.1 <i>Student E</i></p>
<p>Talk 24: Multiple Access Protocols and LANs Channel Partitioning Protocols Random Access Protocols Taking-Turns Protocols Section 5.3 <i>Student D</i></p>	<p>Talk 26: Ethernet Multiple Access Protocol Technologies Hubs Sections 5.5.2-5.6.1 <i>Student A</i></p>
<p>March 16 <i>Break</i></p>	<p>March 18 <i>Break</i></p>
<p>March 23 <i>Break</i></p>	<p>March 25 <i>Break</i></p>
<p>March 30 Talk 27: Bridges, Switches IEEE 802.11 LANs Architecture Protocols Sections 5.6.2-5.7 <i>Student B</i></p>	<p>April 1 Talk 29: Asynchronous Transfer Mode (ATM) Principal Characteristics, Layers IP Over ATM ARP and ATM X.25 and Frame Relay Sections 5.9.5-5.11 <i>Student D</i></p>
<p>Talk 28: Asynchronous Transfer Mode (ATM) Point-to-Point Protocol (PPP) Principal Characteristics Layers Sections 5.8-5.9.4 <i>Student C</i></p>	<p>Talk 30: Multimedia Networking Applications Audio and Video Compression Streaming Sections 6.1-6.2 <i>Student E</i></p>

<i>Tuesday</i>	<i>Thursday</i>
<p>April 6 Talk 31: Best-Effort Service Example: Internet Phone RTP Sections 6.3-6.4 <i>Student A</i></p>	<p>April 8 <i>No Group Meeting; Work on Projects</i></p>
<p>Talk 32: Beyond Best-Effort Scheduling Policing Mechanisms Sections 6.5-6.6 <i>Student B</i></p>	
<p>April 13 Talk 33: Integrated Services RSVP Examples Sections 6.7-6.8 <i>Student C</i></p>	<p>April 15 <i>No Group Meeting; Work on Projects</i></p>
<p>Talk 34: Differentiated Services Interview: Henning Schulzrinne (pp. 563-564) Sections 6.9-6.10 <i>Student D</i></p>	

<i>Tuesday</i>	<i>Thursday</i>
<p>April 20 Talk 35: Network Security Internet Considerations Principles of Cryptography Sections 7.1-7.2 <i>Student E</i></p>	<p>April 22 <i>No Group Meeting; Work on Projects</i></p>
<p>Talk 36: Authentication Protocols Integrity Digital Signatures, Message Digests, Hashing Sections 7.3-7.4 <i>Student A</i></p>	
<p>April 27 <i>No Group Meeting; Work on Projects</i></p>	<p>April 29 Talk 37: Key Distribution Secure E-Mail Interview: Philip Zimmermann (pp. 624-625) Sections 7.5-7.6 <i>Student B</i></p>
	<p>Talk 38: Internet Commerce SSL SET Network Layer Security: IPsec Sections 7.7-7.9 <i>Student C</i></p>

<i>Tuesday</i>	<i>Thursday</i>
<p>May 4 Talk 39: Network Management Management Infrastructure Structure of Management Information Management Information Base Sections 8.1-8.3.2 <i>Student D</i></p>	<p>May 6 Discussion of Projects Wrap-up Evaluation <i>Henry Walker</i></p>
<p>Talk 40: SNMP Protocol Operations Security and Administration ASN.1 Firewalls Interview: Jeff Case (pp. 660-661) Sections 8.4-8.6 <i>Student E</i></p>
